

Heatmap showing AUROC values for a large number of samples. The color scale ranges from 0 (blue) to 1 (red). The heatmap is a square matrix where the diagonal elements are all 1.0, indicating perfect self-similarity. The off-diagonal elements show varying degrees of similarity between different samples, with red indicating higher similarity and blue indicating lower similarity. The samples are ordered by hierarchical clustering, as shown by the dendrogram on the left.
